SUMMARY

Computer Science undergraduate specializing in defensive security. Built and documented a home SOC lab (Wazuh SIEM ingesting Sysmon telemetry from a Windows endpoint) and a Python file integrity monitor, both publicly documented on GitHub. Seeking a blue-team/SOC internship.

PROJECTS

SOC Home Lab — Wazuh SIEM

- Deployed Wazuh 4.9.2 (manager, indexer, dashboard) on Ubuntu 22.04 in an isolated VirtualBox host-only network with static IP addressing
- Instrumented a Windows 10 endpoint with the Wazuh agent and Sysmon (SwiftOnSecurity config), forwarding the Sysmon Operational channel to the SIEM
- Validated end-to-end detection by triggering and confirming a high-severity alert on encoded PowerShell execution
- Full architecture and phase-by-phase writeup on GitHub

File Integrity Monitor — Python

- Built a CLI tool (argparse: baseline/check subcommands) that snapshots directories with chunked SHA-256 hashing and reports added, removed, and modified files
- Implemented JSON baseline persistence, per-file permission error handling, and support for single files and recursive directory trees using only the standard library
- Documented design decisions and usage in a GitHub README

EDUCATION

B.Tech in Computer Science — South Asian University, New Delhi

2024–2028

- Recipient of the Presidential Scholarship for academic excellence

A-Levels — Headstart School, Islamabad

2020–2024

- Biology, Chemistry, Mathematics, Physics

EXPERIENCE

Social Media Intern — Glimpse Markets

Jun 2025 - Apr 2026

- Created and scheduled high-engagement marketing content for a cryptocurrency audience
- Skills gained: content creation, digital marketing, social media management, copywriting, video editing, photo editing

Intern — Engineering General Consultants (Pvt) Ltd

Oct 2023 - Nov 2023

- Shadowed engineering professionals across active projects
- Skills gained: technical documentation, site observation, teamwork, professional communication

CERTIFICATIONS

Pre Security — TryHackMe

2026

SKILLS

Security: SIEM (Wazuh), Sysmon, Detection Validation, Network Security, Wireshark, Burp Suite, Metasploit

Languages & Tools: Python, C, Bash, SQL, Linux, Git, VirtualBox

Spoken Languages: English, Nepali, Hindi, German
