PROJECTS

Internet-Facing SSH Honeypot — Cowrie + Wazuh

[GitHub](#)

- Ran a Cowrie v3.0.13 SSH honeypot on an Oracle Cloud Ubuntu 22.04 VM, hardened with iptables port redirection (22→2222), default-deny egress rules, and key-only admin access on a non-standard port
- Fed Cowrie JSON logs into a Wazuh 4.14 SIEM on the same host and wrote custom detection rules, including one that flags SSH brute-force by source IP (MITRE ATT&CK T1110.001), then confirmed each fired in the dashboard
- Captured and analyzed 1,500 attack sessions from 580 unique IPs, finding credential-spray campaigns, Mirai-style fingerprinting, and five malware samples I checked against VirusTotal, then wrote the analysis up in full

SOC Home Lab — Wazuh SIEM

[GitHub](#)

- Set up Wazuh 4.9.2 (manager, indexer, dashboard) on Ubuntu 22.04 in an isolated VirtualBox host-only network, with a Windows 10 endpoint running the Wazuh agent and Sysmon (SwiftOnSecurity config)
- Ran a six-stage attack chain from a Kali box (WMI remote access, discovery, tool transfer, LSASS credential dumping, scheduled-task persistence, and log clearing) and mapped each step to MITRE ATT&CK
- Wrote Wazuh detection rules for every stage and verified each alert in the dashboard, including a two-tier rule that raises severity on bursts of recon activity
- Found a gap in Wazuh's built-in LSASS rule 92900, which misses the comsvcs.dll MiniDump technique at grantedAccess 0x1FFFFFF, and opened an upstream issue (wazuh/wazuh #38716) with a CallTrace-scoped fix

File Integrity Monitor — Python

[GitHub](#)

- Wrote a CLI tool with baseline and check subcommands that snapshots a directory using chunked SHA-256 hashing and reports what was added, removed, or modified
- Stored baselines as JSON, handled per-file permission errors, and supported both single files and recursive directory trees using only the standard library

EDUCATION

B.Tech in Computer Science — South Asian University, New Delhi

2024–2028

- Recipient of the Presidential Scholarship for academic excellence

A-Levels — Headstart School, Islamabad

2020–2024

- Biology, Chemistry, Mathematics, Physics

EXPERIENCE

Social Media Intern — Glimpse Markets

Jun 2025 - Apr 2026

- Created and scheduled high-engagement marketing content for a cryptocurrency audience

Intern — Engineering General Consultants (Pvt) Ltd

Oct 2023 - Nov 2023

- Shadowed engineering professionals across active projects

CERTIFICATIONS

Pre Security (SEC 0) — TryHackMe

2026

Cyber Security 101 (SEC1) — TryHackMe

2026

SKILLS

Security: SIEM (Wazuh), Honeypots (Cowrie), Detection Engineering, Log Analysis, Sysmon, MITRE ATT&CK, Malware Triage (VirusTotal), Wireshark

Systems & Cloud: Linux, Linux Hardening (iptables), Oracle Cloud (OCI), VirtualBox

Languages & Tools: Python, C, Bash, SQL, Git

Spoken Languages: English, German, Nepali, Hindi
